

COMBI FLUX REGULATOR FOR ENERGY SAVING IN LIGHTING SYSTEMS

Like all Agentech flux regulators, the COMBI also can work with all common types of lamps with electromagnetic ballast:

- fluorescents
- sodium vapours
- mercury vapours
- halogens
- metal halides

The COMBI flux regulator saves up to 40% of energy, bringing the following benefits:

- increased lamp life
- reduced maintenance costs
- lower costs for disposal of lamps

MAIN FEATURES

- 8 different voltage levels operating by the control panel
- WARM UP time set by the control panel
- bypass status set from the control panel
- extremely simple and intuitive
- very versatile thanks to size and weight

After setting the parameters, the regulator operates automatically without the need for further actions.

The COMBI regulator can be installed in single and three phase electrical systems, either in cabinets or wall while maintaining an IP20 protection degree.

CODE	MODEL	I _{OUT}	P _{TOT}
101615	GENIUS POWER COMBI 6	6A	1.4KVA
101616	GENIUS POWER COMBI 10	10A	2.3KVA
101617	GENIUS POWER COMBI 12	12A	2.8KVA
